Plan to Achieve Our Goals

Our team will use the Head Start Task as a focused outreach campaign to connect students from different colleges with the National Entrepreneurship Challenge and the idea of building an active E-Cell. We will begin with a virtual icebreaker meeting to align every member on the purpose, key message, outreach target and evidence required. After creating the official framed team picture, our E-Cell page and every member will publish or share it, tag @iitbombay_ecell and use the required hashtags.

Each member will identify at least two eligible friends from different colleges, while our internal target will be four to five meaningful contacts per member. Priority will be given to students who demonstrate leadership, innovation, event-management or startup interests. We will explain the benefits of NEC through personal conversations and share our NEC reference ID with interested students. A central tracker will record the person contacted, college, contact details, social-media handle, first-contact date, follow-up date and registration status.

Our campaign will combine Instagram stories and posts, direct messages, WhatsApp networks, student clubs, alumni contacts and inter-college connections. We will follow up within 48 hours, answer basic questions, share relevant NEC information and encourage each interested group to register. Screenshots will be collected after 20 hours and before the stories expire. The documentation lead will verify links, screenshots, follower eligibility, consented contact details and registration confirmations before compiling the final PDF. Our goal is to exceed the minimum mentions and convert genuine interest into registered NEC teams that can build entrepreneurship communities across campuses.
